SUMMARY

Engineering Manager and principal-level frontend engineer with 15+ years architecting, scaling and modernising large customer-facing platforms across SaaS, cybersecurity and enterprise. Leads a cross-geography team of seven while owning the architecture hands-on. AI-first in practice: LLMs in the product, in the engineering workflow, and in a production media pipeline built and operated end to end.

Engineering Manager – Frontend – HivePro Inc.

SEP 2023 – PRESENT

Cybersecurity · Threat Exposure Management · Remote / Pune, India

- Lead, mentor and grow a team of 7 engineers across three time zones – hiring, performance reviews, career growth and roadmap planning.
- Led an end-to-end re-architecture that cut page load time by ~63% and lifted Core Web Vitals, accessibility and developer velocity with it.
- Drove AI adoption across the engineering workflow – coding assistants and automation in development, testing and documentation, with measurable onboarding gains.
- Established code-review standards, CI/CD pipelines and frontend testing practice (Jest, React Testing Library) that cut regression rates.
- Escalation point for high-risk changes and production incidents; own the post-incident review.

Senior Software Engineer – Viasat Inc.

DEC 2021 – JUN 2023

Global satellite communications · Carlsbad, CA, USA

- Designed customer-facing web applications with React, Node.js and GraphQL for a large SaaS-style platform.
- Implemented monorepo and micro-frontend architecture, enabling independent team ownership and decoupled, safely reversible deployments.
- Contributed to AWS deployments (EC2, S3, CloudFront) and CI/CD, focused on rollback safety and observability.

UI Engineer / Senior Frontend Developer – Zensar Technologies

FEB 2015 – DEC 2021

Deployed at Cisco Systems · San Jose, CA, USA

- Delivered large-scale customer-facing and internal enterprise applications in React, Angular, Backbone.js and Marionette.js.
- Led modernisation of legacy Backbone/Marionette applications onto React, reducing technical debt and improving performance.
- Drove adoption of TypeScript and shared component libraries across teams for type safety and UI consistency.

Senior Software Engineer – Mastek Services Ltd

JUL 2014 – DEC 2014

UK Government projects · Pune, India

- Built greenfield applications for UK Government projects, partnering on REST API design, compliance and accessibility.

Senior Software Engineer – InfoBeans Systems

JUN 2012 – JUN 2014

Full-stack delivery · Indore, India

- Worked across frontend and backend – database modelling, Java REST APIs and UI development; mentored junior engineers.

- Delivered client applications in Java/Struts – schema design, backend APIs and unit testing.

SKILLS

LEADERSHIP	Team management · Hiring · Performance reviews · Technical strategy · Roadmapping · Agile / Scrum · Stakeholder alignment
AI	LLM integration (Gemini, Claude, OpenAI) · Coding assistants · Prompt engineering · Workflow automation (n8n) · AI reliability & cost governance
FRONTEND	React · TypeScript · Next.js · Redux Toolkit / Saga · Angular · Micro-frontends · Design systems · Jest / RTL · Core Web Vitals · WCAG
BACKEND	Node.js · Express · REST · GraphQL · Java REST services · WebSockets · MongoDB · PostgreSQL · MySQL · Redis
PLATFORM	AWS (EC2, S3, Lambda, CloudFront) · Docker · CI/CD · GitHub Actions · Jenkins · Proxmox · Linux · Observability
ARCHITECTURE	Micro-frontends · Monorepo (Nx, Turborepo) · Microservices · Event-driven · Distributed systems · System design

SELECTED PROJECTS

Automated AI media pipeline [thepulsenews.in](#)

Production content pipeline – Gemini for scripting and quality scoring, ElevenLabs for voice, Remotion for programmatic rendering, orchestrated in n8n on Docker with Cloudflare R2. Scheduled, multi-language, with fail-closed content gates and batch resilience.

Proxmox home lab [mylocalcloud.in](#)

Multi-VM Proxmox lab running self-hosted services, exposed through Cloudflare Tunnels with no open ports. Designed, built and operated solo.

EquiSplit [equisplit.mylocalcloud.in](#)

Splitwise-style expense-sharing platform with web and Android clients on Node.js and MongoDB – push notifications, async event handling and offline conflict resolution.

EDUCATION

Bachelor of Engineering

2006 – 2010

Rajiv Gandhi Proudlyogiki Vishwavidyalaya (RGPV)
